RAPID REPORT GENERATOR for SAP Fiori®

INTEGRATING ALV REPORTS = LOSING A DAY'S WORK? NOT ANYMORE!

We say: This can be done faster! One hour customizing instead of 3-5 days or more of programming effort!

UNBEATABLE USABILITY, EASY HANDLING

- Quick set-up & administration: no coding required for end-users
- Low code principle
- Responsive design: perfect rendering on all devices
- ALV reports und SAP® queries can be easily reused without major changes
- Batch processing: original report is still usable in GUI/batch
- Automatically generate charts & tables from report data

REPORTS IN SAP FIORI® AT THE PUSH OF A BUTTON

Get a complete report within just 5 minutes!

The existing report or SAP® query is entered in the customizing of the Rapid Report Generator®. Afterwards, an OData service is generated, consumed and delivered by our Fiori® Report App.

FEATURES & PARTICULARITIES

- **Batch processing**
- **Variant management**
- **Actions:** extend all reports with up to 3 actions & trigger processes (such as goods postings) directly
- **Intent-based navigation via semantic objects:** Fiori® applications, web dynpros, GUI transactions
- **OData:** open standards
- **Totals, subtotals, groups**
- **Value helps:** elementary SE11 value helps, ABAP® dictionary domain fixed values, table / DB view / CDS view
- **SAP® standard authorizations and user restrictions** on report- and group level
